

ACCOUNTING / COMPTABILITE

Upper Secondary / Terminale Coursebook

COURSE FOCUS

- Bookkeeping and double entry
- Financial statements
- Costing, budgets and ratios
- Internal control and accounting ethics

80-PAGE COMPLETE COURSEBOOK

GETI learning resource • structured study • practice • revision • reference

How to Use This Book

WHAT YOU WILL LEARN

- Core concepts and methods across accounting / comptabilite.
- Clear explanations, model applications and guided practice.
- Thirty complete lessons followed by mixed revision tests.
- Answer guidance, quick-reference material and final revision checklist.

RECOMMENDED STUDY METHOD

1. Read the lesson objective before studying the main idea.
2. Study the key terms and model example, then explain them in your own words.
3. Complete the practice page without checking the answer guidance.
4. Correct mistakes by writing the rule, principle or method behind the correction.
5. Review difficult lessons after 24 hours and again after one week.

BOOK ORGANIZATION

- Lessons 1-15: foundations and core methods.
- Lessons 16-30: advanced applications and integrated study.
- Pages 65-72: eight mixed revision tests.
- Pages 73-78: answer guidance and correction strategies.
- Pages 79-80: quick reference and final checklist.

Table of Contents

Lessons 1-15

Lesson	Topic	Pages
1	Introduction to Accounting	5-6
2	Accounting Equation	7-8
3	Source Documents	9-10
4	Double-Entry Bookkeeping	11-12
5	Journals	13-14
6	Ledgers	15-16
7	Trial Balance	17-18
8	Cash Book	19-20
9	Petty Cash	21-22
10	Bank Reconciliation	23-24
11	Inventory	25-26
12	Depreciation	27-28
13	Receivables and Payables	29-30
14	Accruals and Prepayments	31-32
15	Bad Debts and Allowances	33-34

LEARNING MAP

Study the course progressively. Each lesson has a concept page followed by a practice page. The final section contains review tests, answer guidance and quick reference pages.

Table of Contents

Lessons 16-30

Lesson	Topic	Pages
16	Income Statement	35-36
17	Statement of Financial Position	37-38
18	Cash Flow Statement	39-40
19	Accounting Errors	41-42
20	Suspense Accounts	43-44
21	Control Accounts	45-46
22	Partnership Accounts	47-48
23	Company Accounts: Introduction	49-50
24	Cost Classification	51-52
25	Contribution and Break-Even	53-54
26	Budgets	55-56
27	Accounting Ratios	57-58
28	Internal Control	59-60
29	Ethics and Accounting Information	61-62
30	Integrated Accounting Review	63-64

LEARNING MAP

Study the course progressively. Each lesson has a concept page followed by a practice page. The final section contains review tests, answer guidance and quick reference pages.

Introduction to Accounting

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of introduction to accounting.
- Apply introduction to accounting to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Introduction to Accounting is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of introduction to accounting.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain introduction to accounting in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Introduction to Accounting - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define introduction to accounting in your own words.
2. List three key ideas connected to introduction to accounting.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of introduction to accounting. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Accounting Equation

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of accounting equation.
- Apply accounting equation to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Accounting Equation is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of accounting equation.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain accounting equation in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Accounting Equation - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define accounting equation in your own words.
2. List three key ideas connected to accounting equation.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of accounting equation. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Source Documents

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of source documents.
- Apply source documents to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Source Documents is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of source documents.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain source documents in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Source Documents - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define source documents in your own words.
2. List three key ideas connected to source documents.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of source documents. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Double-Entry Bookkeeping

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of double-entry bookkeeping.
- Apply double-entry bookkeeping to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Double-Entry Bookkeeping is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of double-entry bookkeeping.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain double-entry bookkeeping in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Double-Entry Bookkeeping - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define double-entry bookkeeping in your own words.
2. List three key ideas connected to double-entry bookkeeping.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of double-entry bookkeeping. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Journals

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of journals.
- Apply journals to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Journals is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of journals.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain journals in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Journals - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define journals in your own words.
2. List three key ideas connected to journals.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of journals. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Ledgers

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of ledgers.
- Apply ledgers to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Ledgers is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of ledgers.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain ledgers in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Ledgers - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define ledgers in your own words.
2. List three key ideas connected to ledgers.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of ledgers. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Trial Balance

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of trial balance.
- Apply trial balance to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Trial Balance is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of trial balance.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain trial balance in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Trial Balance - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define trial balance in your own words.
2. List three key ideas connected to trial balance.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of trial balance. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Cash Book

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of cash book.
- Apply cash book to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Cash Book is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of cash book.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain cash book in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Cash Book - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define cash book in your own words.
2. List three key ideas connected to cash book.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of cash book. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Petty Cash

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of petty cash.
- Apply petty cash to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Petty Cash is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of petty cash.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain petty cash in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Petty Cash - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define petty cash in your own words.
2. List three key ideas connected to petty cash.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of petty cash. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Bank Reconciliation

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of bank reconciliation.
- Apply bank reconciliation to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Bank Reconciliation is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of bank reconciliation.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain bank reconciliation in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Bank Reconciliation - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define bank reconciliation in your own words.
2. List three key ideas connected to bank reconciliation.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of bank reconciliation. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Inventory

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of inventory.
- Apply inventory to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Inventory is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of inventory.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain inventory in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Inventory - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define inventory in your own words.
2. List three key ideas connected to inventory.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of inventory. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Depreciation

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of depreciation.
- Apply depreciation to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Depreciation is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of depreciation.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain depreciation in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Depreciation - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define depreciation in your own words.
2. List three key ideas connected to depreciation.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of depreciation. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Receivables and Payables

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of receivables and payables.
- Apply receivables and payables to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Receivables and Payables is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of receivables and payables.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain receivables and payables in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Receivables and Payables - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define receivables and payables in your own words.
2. List three key ideas connected to receivables and payables.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of receivables and payables. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Accruals and Prepayments

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of accruals and prepayments.
- Apply accruals and prepayments to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Accruals and Prepayments is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of accruals and prepayments.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain accruals and prepayments in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Accruals and Prepayments - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define accruals and prepayments in your own words.
2. List three key ideas connected to accruals and prepayments.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of accruals and prepayments. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Bad Debts and Allowances

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of bad debts and allowances.
- Apply bad debts and allowances to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Bad Debts and Allowances is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of bad debts and allowances.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain bad debts and allowances in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Bad Debts and Allowances - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define bad debts and allowances in your own words.
2. List three key ideas connected to bad debts and allowances.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of bad debts and allowances. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Income Statement

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of income statement.
- Apply income statement to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Income Statement is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of income statement.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain income statement in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Income Statement - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define income statement in your own words.
2. List three key ideas connected to income statement.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of income statement. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Statement of Financial Position

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of statement of financial position.
- Apply statement of financial position to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Statement of Financial Position is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of statement of financial position.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain statement of financial position in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Statement of Financial Position - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define statement of financial position in your own words.
2. List three key ideas connected to statement of financial position.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of statement of financial position. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Cash Flow Statement

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of cash flow statement.
- Apply cash flow statement to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Cash Flow Statement is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of cash flow statement.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain cash flow statement in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Cash Flow Statement - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define cash flow statement in your own words.
2. List three key ideas connected to cash flow statement.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of cash flow statement. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Accounting Errors

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of accounting errors.
- Apply accounting errors to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Accounting Errors is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of accounting errors.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain accounting errors in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Accounting Errors - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define accounting errors in your own words.
2. List three key ideas connected to accounting errors.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of accounting errors. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Suspense Accounts

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of suspense accounts.
- Apply suspense accounts to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Suspense Accounts is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of suspense accounts.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain suspense accounts in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Suspense Accounts - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define suspense accounts in your own words.
2. List three key ideas connected to suspense accounts.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of suspense accounts. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Control Accounts

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of control accounts.
- Apply control accounts to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Control Accounts is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of control accounts.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain control accounts in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Control Accounts - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define control accounts in your own words.
2. List three key ideas connected to control accounts.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of control accounts. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Partnership Accounts

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of partnership accounts.
- Apply partnership accounts to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Partnership Accounts is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of partnership accounts.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain partnership accounts in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Partnership Accounts - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define partnership accounts in your own words.
2. List three key ideas connected to partnership accounts.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of partnership accounts. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Company Accounts: Introduction

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of company accounts: introduction.
- Apply company accounts: introduction to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Company Accounts: Introduction is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of company accounts: introduction.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain company accounts: introduction in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Company Accounts: Introduction - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define company accounts: introduction in your own words.
2. List three key ideas connected to company accounts: introduction.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of company accounts: introduction. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Cost Classification

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of cost classification.
- Apply cost classification to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Cost Classification is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of cost classification.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain cost classification in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Cost Classification - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define cost classification in your own words.
2. List three key ideas connected to cost classification.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of cost classification. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Contribution and Break-Even

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of contribution and break-even.
- Apply contribution and break-even to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Contribution and Break-Even is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of contribution and break-even.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain contribution and break-even in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Contribution and Break-Even - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define contribution and break-even in your own words.
2. List three key ideas connected to contribution and break-even.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of contribution and break-even. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Budgets

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of budgets.
- Apply budgets to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Budgets is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of budgets.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain budgets in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Budgets - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define budgets in your own words.
2. List three key ideas connected to budgets.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of budgets. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Accounting Ratios

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of accounting ratios.
- Apply accounting ratios to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Accounting Ratios is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of accounting ratios.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain accounting ratios in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Accounting Ratios - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define accounting ratios in your own words.
2. List three key ideas connected to accounting ratios.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of accounting ratios. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Internal Control

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of internal control.
- Apply internal control to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Internal Control is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of internal control.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain internal control in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Internal Control - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define internal control in your own words.
2. List three key ideas connected to internal control.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of internal control. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Ethics and Accounting Information

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of ethics and accounting information.
- Apply ethics and accounting information to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Ethics and Accounting Information is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of ethics and accounting information.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain ethics and accounting information in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Ethics and Accounting Information - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define ethics and accounting information in your own words.
2. List three key ideas connected to ethics and accounting information.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of ethics and accounting information. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Integrated Accounting Review

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of integrated accounting review.
- Apply integrated accounting review to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Integrated Accounting Review is an important part of ACCOUNTING / COMPTABILITE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of integrated accounting review.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain integrated accounting review in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Integrated Accounting Review - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define integrated accounting review in your own words.
2. List three key ideas connected to integrated accounting review.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of integrated accounting review. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Revision Test 1

MIXED REVIEW QUESTIONS

1. Explain one central idea from Introduction to Accounting.
2. Apply Introduction to Accounting to one original example.
3. Explain one central idea from Accounting Equation.
4. Apply Accounting Equation to one original example.
5. Explain one central idea from Source Documents.
6. Apply Source Documents to one original example.
7. Explain one central idea from Double-Entry Bookkeeping.
8. Apply Double-Entry Bookkeeping to one original example.
9. Explain one central idea from Journals.
10. Apply Journals to one original example.
11. Explain one central idea from Ledgers.
12. Apply Ledgers to one original example.

EXAM STRATEGY

Answer the exact command word. Define before evaluating. Show steps for calculations or procedures. Use evidence or examples. Check the final answer for accuracy, relevance and completeness.

Revision Test 2

MIXED REVIEW QUESTIONS

1. Explain one central idea from Journals.
2. Apply Journals to one original example.
3. Explain one central idea from Ledgers.
4. Apply Ledgers to one original example.
5. Explain one central idea from Trial Balance.
6. Apply Trial Balance to one original example.
7. Explain one central idea from Cash Book.
8. Apply Cash Book to one original example.
9. Explain one central idea from Petty Cash.
10. Apply Petty Cash to one original example.
11. Explain one central idea from Bank Reconciliation.
12. Apply Bank Reconciliation to one original example.

EXAM STRATEGY

Answer the exact command word. Define before evaluating. Show steps for calculations or procedures. Use evidence or examples. Check the final answer for accuracy, relevance and completeness.

Revision Test 3

MIXED REVIEW QUESTIONS

1. Explain one central idea from Petty Cash.
2. Apply Petty Cash to one original example.
3. Explain one central idea from Bank Reconciliation.
4. Apply Bank Reconciliation to one original example.
5. Explain one central idea from Inventory.
6. Apply Inventory to one original example.
7. Explain one central idea from Depreciation.
8. Apply Depreciation to one original example.
9. Explain one central idea from Receivables and Payables.
10. Apply Receivables and Payables to one original example.
11. Explain one central idea from Accruals and Prepayments.
12. Apply Accruals and Prepayments to one original example.

EXAM STRATEGY

Answer the exact command word. Define before evaluating. Show steps for calculations or procedures. Use evidence or examples. Check the final answer for accuracy, relevance and completeness.

Revision Test 4

MIXED REVIEW QUESTIONS

1. Explain one central idea from Receivables and Payables.
2. Apply Receivables and Payables to one original example.
3. Explain one central idea from Accruals and Prepayments.
4. Apply Accruals and Prepayments to one original example.
5. Explain one central idea from Bad Debts and Allowances.
6. Apply Bad Debts and Allowances to one original example.
7. Explain one central idea from Income Statement.
8. Apply Income Statement to one original example.
9. Explain one central idea from Statement of Financial Position.
10. Apply Statement of Financial Position to one original example.
11. Explain one central idea from Cash Flow Statement.
12. Apply Cash Flow Statement to one original example.

EXAM STRATEGY

Answer the exact command word. Define before evaluating. Show steps for calculations or procedures. Use evidence or examples. Check the final answer for accuracy, relevance and completeness.

Revision Test 5

MIXED REVIEW QUESTIONS

1. Explain one central idea from Statement of Financial Position.
2. Apply Statement of Financial Position to one original example.
3. Explain one central idea from Cash Flow Statement.
4. Apply Cash Flow Statement to one original example.
5. Explain one central idea from Accounting Errors.
6. Apply Accounting Errors to one original example.
7. Explain one central idea from Suspense Accounts.
8. Apply Suspense Accounts to one original example.
9. Explain one central idea from Control Accounts.
10. Apply Control Accounts to one original example.
11. Explain one central idea from Partnership Accounts.
12. Apply Partnership Accounts to one original example.

EXAM STRATEGY

Answer the exact command word. Define before evaluating. Show steps for calculations or procedures. Use evidence or examples. Check the final answer for accuracy, relevance and completeness.

Revision Test 6

MIXED REVIEW QUESTIONS

1. Explain one central idea from Control Accounts.
2. Apply Control Accounts to one original example.
3. Explain one central idea from Partnership Accounts.
4. Apply Partnership Accounts to one original example.
5. Explain one central idea from Company Accounts: Introduction.
6. Apply Company Accounts: Introduction to one original example.
7. Explain one central idea from Cost Classification.
8. Apply Cost Classification to one original example.
9. Explain one central idea from Contribution and Break-Even.
10. Apply Contribution and Break-Even to one original example.
11. Explain one central idea from Budgets.
12. Apply Budgets to one original example.

EXAM STRATEGY

Answer the exact command word. Define before evaluating. Show steps for calculations or procedures. Use evidence or examples. Check the final answer for accuracy, relevance and completeness.

Revision Test 7

MIXED REVIEW QUESTIONS

1. Explain one central idea from Contribution and Break-Even.
2. Apply Contribution and Break-Even to one original example.
3. Explain one central idea from Budgets.
4. Apply Budgets to one original example.
5. Explain one central idea from Accounting Ratios.
6. Apply Accounting Ratios to one original example.
7. Explain one central idea from Internal Control.
8. Apply Internal Control to one original example.
9. Explain one central idea from Ethics and Accounting Information.
10. Apply Ethics and Accounting Information to one original example.
11. Explain one central idea from Integrated Accounting Review.
12. Apply Integrated Accounting Review to one original example.

EXAM STRATEGY

Answer the exact command word. Define before evaluating. Show steps for calculations or procedures. Use evidence or examples. Check the final answer for accuracy, relevance and completeness.

Revision Test 8

MIXED REVIEW QUESTIONS

1. Explain one central idea from Ethics and Accounting Information.
2. Apply Ethics and Accounting Information to one original example.
3. Explain one central idea from Integrated Accounting Review.
4. Apply Integrated Accounting Review to one original example.
5. Explain one central idea from Introduction to Accounting.
6. Apply Introduction to Accounting to one original example.
7. Explain one central idea from Accounting Equation.
8. Apply Accounting Equation to one original example.
9. Explain one central idea from Source Documents.
10. Apply Source Documents to one original example.
11. Explain one central idea from Double-Entry Bookkeeping.
12. Apply Double-Entry Bookkeeping to one original example.

EXAM STRATEGY

Answer the exact command word. Define before evaluating. Show steps for calculations or procedures. Use evidence or examples. Check the final answer for accuracy, relevance and completeness.

Answer Guidance 1

HOW TO CHECK YOUR WORK

- Definition questions: use precise subject vocabulary and avoid circular definitions.
- Explanation questions: show cause-and-effect or the sequence of reasoning.
- Comparison questions: use the same criteria for both sides and state similarities and differences.
- Application questions: use details from the scenario, data, system or example.
- Calculation questions: show formulas, substitutions, units and a reasonableness check.
- Evaluation questions: present relevant evidence, limitations and a supported conclusion.
- Technical questions: distinguish components, processes, inputs, outputs and controls.
- Essay questions: organize the answer with a direct introduction, developed paragraphs and a concise conclusion.

Answer Guidance 2

HOW TO CHECK YOUR WORK

- Definition questions: use precise subject vocabulary and avoid circular definitions.
- Explanation questions: show cause-and-effect or the sequence of reasoning.
- Comparison questions: use the same criteria for both sides and state similarities and differences.
- Application questions: use details from the scenario, data, system or example.
- Calculation questions: show formulas, substitutions, units and a reasonableness check.
- Evaluation questions: present relevant evidence, limitations and a supported conclusion.
- Technical questions: distinguish components, processes, inputs, outputs and controls.
- Essay questions: organize the answer with a direct introduction, developed paragraphs and a concise conclusion.

Answer Guidance 3

HOW TO CHECK YOUR WORK

- Definition questions: use precise subject vocabulary and avoid circular definitions.
- Explanation questions: show cause-and-effect or the sequence of reasoning.
- Comparison questions: use the same criteria for both sides and state similarities and differences.
- Application questions: use details from the scenario, data, system or example.
- Calculation questions: show formulas, substitutions, units and a reasonableness check.
- Evaluation questions: present relevant evidence, limitations and a supported conclusion.
- Technical questions: distinguish components, processes, inputs, outputs and controls.
- Essay questions: organize the answer with a direct introduction, developed paragraphs and a concise conclusion.

Answer Guidance 4

HOW TO CHECK YOUR WORK

- Definition questions: use precise subject vocabulary and avoid circular definitions.
- Explanation questions: show cause-and-effect or the sequence of reasoning.
- Comparison questions: use the same criteria for both sides and state similarities and differences.
- Application questions: use details from the scenario, data, system or example.
- Calculation questions: show formulas, substitutions, units and a reasonableness check.
- Evaluation questions: present relevant evidence, limitations and a supported conclusion.
- Technical questions: distinguish components, processes, inputs, outputs and controls.
- Essay questions: organize the answer with a direct introduction, developed paragraphs and a concise conclusion.

Answer Guidance 5

HOW TO CHECK YOUR WORK

- Definition questions: use precise subject vocabulary and avoid circular definitions.
- Explanation questions: show cause-and-effect or the sequence of reasoning.
- Comparison questions: use the same criteria for both sides and state similarities and differences.
- Application questions: use details from the scenario, data, system or example.
- Calculation questions: show formulas, substitutions, units and a reasonableness check.
- Evaluation questions: present relevant evidence, limitations and a supported conclusion.
- Technical questions: distinguish components, processes, inputs, outputs and controls.
- Essay questions: organize the answer with a direct introduction, developed paragraphs and a concise conclusion.

Answer Guidance 6

HOW TO CHECK YOUR WORK

- Definition questions: use precise subject vocabulary and avoid circular definitions.
- Explanation questions: show cause-and-effect or the sequence of reasoning.
- Comparison questions: use the same criteria for both sides and state similarities and differences.
- Application questions: use details from the scenario, data, system or example.
- Calculation questions: show formulas, substitutions, units and a reasonableness check.
- Evaluation questions: present relevant evidence, limitations and a supported conclusion.
- Technical questions: distinguish components, processes, inputs, outputs and controls.
- Essay questions: organize the answer with a direct introduction, developed paragraphs and a concise conclusion.

ACCOUNTING / COMPTABILITE Reference

QUICK REFERENCE

- Define key terms before applying them.
- Use symbols, notation and units consistently where relevant.
- Distinguish facts, assumptions, examples and conclusions.
- Use diagrams, tables, formulas or structured steps when they improve clarity.
- Check calculations and technical procedures independently where possible.
- For written analysis, connect each paragraph to the question.
- For practical work, document inputs, process, output, tests and corrections.
- Review weak lessons using spaced repetition and mixed practice.

Final Revision Checklist

BEFORE THE FINAL EXAMINATION

- ☐ I can define the core concepts accurately.
- ☐ I can explain methods and processes step by step.
- ☐ I can apply the subject to unfamiliar examples.
- ☐ I can identify common errors and correct them.
- ☐ I can compare related ideas using clear criteria.
- ☐ I can complete mixed practice without notes.
- ☐ I can check calculations, evidence, logic or technical results.
- ☐ I can write a concise, direct final conclusion.
