LESSON 01 - CORE GRAMMAR

Parts of Speech

Concepts, forms, and model examples

Learning Objectives

- Identify the eight main parts of speech.
- Explain how a word can change function according to context.
- Use parts of speech to analyse complete sentences.

Concept	Explanation	Example
Nouns & Pronouns	Nouns name people, places, things, or ideas. Pronouns replace nouns to avoid repetition.	The teacher explained the rule. She gave us examples.
Verbs	Verbs express actions, events, or states. Auxiliary verbs help form tenses, questions, negatives, and passive forms.	They have completed the task.
Adjectives & Adverbs	Adjectives describe nouns or pronouns. Adverbs usually modify verbs, adjectives, other adverbs, or whole clauses.	A careful student works carefully.
Prepositions, Conjunctions & Interjections	Prepositions show relationships; conjunctions connect words or clauses; interjections express sudden feeling.	We waited until noon, but he arrived after lunch. Wow!

Key Rules

- A word class is determined by its job in the sentence, not only by its dictionary meaning.
- Some words belong to more than one class: “fast” can be an adjective or an adverb.
- Function words such as articles, prepositions, and conjunctions often organize grammatical relationships.

Study Tip

- Read each example aloud. Then create one new sentence that follows the same pattern as Lesson 1.

Extra Model Sentences

1. The teacher explained the rule. She gave us examples.
2. They have completed the task.
3. A careful student works carefully.
4. We waited until noon, but he arrived after lunch. Wow!
5. Create one parallel sentence of your own and identify the target grammar.

Worked Analysis Routine

- Step 1: Locate the target word, phrase, or clause.
- Step 2: Name its grammatical form and function.
- Step 3: Explain why another possible form would change the meaning or be incorrect.
- Step 4: Rewrite the example with a new subject, time reference, or context while keeping the same rule.

Your Example

Write one accurate example and underline the target grammar.

LESSON 01 - PRACTICE

Parts of Speech

Common errors, guided practice, and mastery check

Common error	Better form	Why?
She sings beautiful.	She sings beautifully.	The word modifies the verb “sings”, so an adverb is needed.

- After answering, reread the complete sentence for meaning as well as grammar.
- When two forms seem possible, explain the difference in meaning before making your final choice.

Notes & Corrections

Record one mistake you made, the correction, and the rule.

LESSON 08 - CORE GRAMMAR

Present Simple and Present Continuous

Concepts, forms, and model examples

Learning Objectives

- Choose between present simple and present continuous.
- Form affirmative, negative, and question structures.
- Recognize stative verbs that rarely take continuous forms.

Concept	Explanation	Example
Present simple	Habits, routines, facts, permanent situations, timetables.	She works every weekday.
Present continuous	Actions happening now, temporary situations, changing trends, arranged future events.	She is working from home this week.
Stative verbs	Often describe states rather than actions.	know, believe, own, need, understand
Time expressions	Frequency markers often signal simple; now/at the moment signal continuous.	usually / every day / now / currently

Key Rules

- Third-person singular present simple usually takes -s/-es.
- Use do/does for simple present negatives and questions.
- Continuous = am/is/are + verb-ing.

Study Tip

LESSON 25 - CORE GRAMMAR

Wishes and If Only

Concepts, forms, and model examples

Learning Objectives

- Express present, past, and future/regret wishes.
- Use wish + past, wish + past perfect, and wish + would.
- Distinguish wish from hope.

Concept	Explanation	Example
Present unreal wish	wish + past simple for a situation we want to be different now.	I wish I had more time.
Past regret	wish + past perfect for a past event we regret.	I wish I had studied harder.
Annoyance/change	wish + would can express a desired change in behaviour or situation.	I wish the bus would come.
If only	Often stronger or more emotional than wish.	If only I knew the answer!

Key Rules

- Were is common in formal “I wish I were...” structures.
- Do not normally use would for your own controllable action: prefer “I wish I studied more” only in special contexts; more naturally “I wish I could study more.”
- Hope usually refers to real possibilities; wish often marks unreality or regret.

Study Tip

- Read each example aloud. Then create one new sentence that follows the same pattern as Lesson 25.

Extra Model Sentences

1. I wish I had more time.
2. I wish I had studied harder.
3. I wish the bus would come.
4. If only I knew the answer!
5. Create one parallel sentence of your own and identify the target grammar.

Worked Analysis Routine

- Step 1: Locate the target word, phrase, or clause.
- Step 2: Name its grammatical form and function.
- Step 3: Explain why another possible form would change the meaning or be incorrect.
- Step 4: Rewrite the example with a new subject, time reference, or context while keeping the same rule.

LESSON 26 - CORE GRAMMAR

Causative Forms: Have/Get Something Done

Concepts, forms, and model examples

Learning Objectives

- Use have/get + object + past participle.
- Describe services arranged for someone else to perform.
- Recognize causative meanings of have, get, make, and let.

Concept	Explanation	Example
Have something done	Arrange for another person to do a service.	I had my car repaired.
Get something done	Similar, often slightly more informal.	She got her phone fixed.
Have someone do	Cause/request someone to perform an action.	I had the technician check the system.
Get someone to do	Persuade or arrange for someone to do something.	We got him to sign the form.

Key Rules

- In have/get something done, the object receives the action and is followed by a past participle.
- The tense is carried by have/get: “will have it repaired”, “has had it repaired”.
- Make + object + base verb expresses strong causation; let + object + base verb expresses permission.

Study Tip

- Read each example aloud. Then create one new sentence that follows the same pattern as Lesson 26.

Extra Model Sentences

1. I had my car repaired.
2. She got her phone fixed.
3. I had the technician check the system.

Would for past habits	Can describe repeated past actions, but not normally past states.	Every summer, we would visit our grandparents.

Key Rules

- After be/get used to, “to” is a preposition, so use a noun or gerund.
- Negative/question past-habit forms often use did: “Did you use to...?”

Final Reminder

- Accuracy grows through repeated practice. When you make an error, do not only correct the sentence: identify the rule, create a new example, and use the structure again in real writing.

Final Self-Check

- Can I identify the subject, verb, objects, modifiers, and clauses in a sentence?
- Can I select tense and aspect according to time and meaning?
