Upper Secondary / Terminale Coursebook

COURSE FOCUS

- Institutions, power and public authority
- Elections, representation and participation
- Public policy and comparative politics
- Neutral analysis using evidence and multiple perspectives

80-PAGE COMPLETE COURSEBOOK

How to Use This Book

WHAT YOU WILL LEARN

- Core concepts and methods across political science.
- Clear explanations, model applications and guided practice.
- Thirty complete lessons followed by mixed revision tests.
- Answer guidance, quick-reference material and final revision checklist.

RECOMMENDED STUDY METHOD

1. Read the lesson objective before studying the main idea.
2. Study the key terms and model example, then explain them in your own words.
3. Complete the practice page without checking the answer guidance.
4. Correct mistakes by writing the rule, principle or method behind the correction.
5. Review difficult lessons after 24 hours and again after one week.

BOOK ORGANIZATION

- Lessons 1-15: foundations and core methods.
- Lessons 16-30: advanced applications and integrated study.
- Pages 65-72: eight mixed revision tests.
- Pages 73-78: answer guidance and correction strategies.
- Pages 79-80: quick reference and final checklist.

What Is Political Science?

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of what is political science?.
- Apply what is political science? to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

What Is Political Science? is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of what is political science?.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain what is political science? in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

What Is Political Science? - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define what is political science? in your own words.
2. List three key ideas connected to what is political science?.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of what is political science?. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Power and Authority

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of power and authority.
- Apply power and authority to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Power and Authority is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define power and authority in your own words.
2. List three key ideas connected to power and authority.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of power and authority. Include a definition, one example, one limitation or checking step, and a concluding sentence.

The State

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of the state.
- Apply the state to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

The State is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define the state in your own words.
2. List three key ideas connected to the state.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of the state. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Nation and National Identity

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of nation and national identity.
- Apply nation and national identity to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Nation and National Identity is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. 7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of nation and national identity. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Sovereignty

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of sovereignty.
- Apply sovereignty to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Sovereignty is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. GUIDED PRACTICE

1. Define sovereignty in your own words.
2. List three key ideas connected to sovereignty.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of sovereignty. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Constitutions

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of constitutions.
- Apply constitutions to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Constitutions is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define constitutions in your own words.
2. List three key ideas connected to constitutions.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of constitutions. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Rule of Law

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of rule of law.
- Apply rule of law to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Rule of Law is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Rule of Law - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define rule of law in your own words.
2. List three key ideas connected to rule of law.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of rule of law. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Separation of Powers

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of separation of powers.
- Apply separation of powers to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Separation of Powers is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define separation of powers in your own words.
2. List three key ideas connected to separation of powers.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of separation of powers. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Political Systems and Regime Types

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of political systems and regime types.
- Apply political systems and regime types to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Political Systems and Regime Types is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define political parties in your own words.
2. List three key ideas connected to political parties.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of political parties. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Interest Groups and Civil Society

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of interest groups and civil society.
- Apply interest groups and civil society to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Interest Groups and Civil Society is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of interest groups and civil society.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain interest groups and civil society in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Interest Groups and Civil Society - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define interest groups and civil society in your own words.
2. List three key ideas connected to interest groups and civil society.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of interest groups and civil society. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Public Opinion

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of public opinion.
- Apply public opinion to a clear academic, technical or real-life example.

Conflict, Peace and Security

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of conflict, peace and security.
- Apply conflict, peace and security to a clear academic, technical or real-life example.
- Use a structured method to analyse, solve or evaluate a related problem.

CORE EXPLANATION

Conflict, Peace and Security is an important part of POLITICAL SCIENCE. A strong learner should first identify the main concept, define the relevant terms precisely, then connect the idea to evidence, a model, a calculation, a system, or a practical situation. The aim is not only to memorize a definition but to understand how the concept works, what assumptions it uses, and how a result can be checked.

KEY POINTS

- Identify the purpose and structure of conflict, peace and security.
- Separate definitions, procedures, evidence and conclusions.
- Use examples that directly match the concept rather than unrelated facts.
- Check accuracy, units, assumptions, sources or logical consistency where relevant.

MODEL APPLICATION

Model task: explain conflict, peace and security in a short response. Start with a precise definition, identify the key mechanism or method, apply it to one concrete example, and finish by stating what the example demonstrates.

STUDY ROUTINE

Step 1: identify the question. Step 2: choose the correct concept or method. Step 3: show reasoning clearly. Step 4: check the result. Step 5: explain the meaning of the answer.

Conflict, Peace and Security - Practice

COMMON ERRORS AND BETTER METHODS

Common error: Using a vague definition.

Better: State the exact meaning and the conditions in which it applies.

Common error: Giving an example without explanation.

Better: Explain why the example demonstrates the concept.

Common error: Skipping the checking stage.

Better: Verify logic, calculations, evidence or assumptions before concluding.

GUIDED PRACTICE

1. Define conflict, peace and security in your own words.
2. List three key ideas connected to conflict, peace and security.
3. Give one accurate example and explain why it is relevant.
4. Identify one common error or misconception.
5. Explain one method for checking an answer or conclusion.
6. Compare two related ideas or approaches.
7. Write a short application to school, work, society, science or technology.
8. Write one exam-style question and outline a strong answer.

MASTERY CHALLENGE

Write a 120-180 word explanation of conflict, peace and security. Include a definition, one example, one limitation or checking step, and a concluding sentence.

Political Research Methods

Concepts, methods, model examples and structured explanation

LEARNING OBJECTIVES

- Explain the central ideas and vocabulary of political research methods.

Answer Guidance 1

HOW TO CHECK YOUR WORK

- Definition questions: use precise subject vocabulary and avoid circular definitions.
- Explanation questions: show cause-and-effect or the sequence of reasoning.
- Comparison questions: use the same criteria for both sides and state similarities and differences.
- Application questions: use details from the scenario, data, system or example.
- Calculation questions: show formulas, substitutions, units and a reasonableness check.
- Evaluation questions: present relevant evidence, limitations and a supported conclusion.
- Technical questions: distinguish components, processes, inputs, outputs and controls.
- Essay questions: organize the answer with a direct introduction, developed paragraphs and a concise conclusion.

QUICK REFERENCE

- Define key terms before applying them.
- Use symbols, notation and units consistently where relevant.
- Distinguish facts, assumptions, examples and conclusions.
- Use diagrams, tables, formulas or structured steps when they improve clarity.
- Check calculations and technical procedures independently where possible.
- For written analysis, connect each paragraph to the question.
- For practical work, document inputs, process, output, tests and corrections.
- Review weak lessons using spaced repetition and mixed practice.

Final Revision Checklist

BEFORE THE FINAL EXAMINATION

- ☐ I can define the core concepts accurately.
- ☐ I can explain methods and processes step by step.
- ☐ I can apply the subject to unfamiliar examples.
- ☐ I can identify common errors and correct them.
- ☐ I can compare related ideas using clear criteria.
- ☐ I can complete mixed practice without notes.
- ☐ I can check calculations, evidence, logic or technical results.
- ☐ I can write a concise, direct final conclusion.
